

FANTASY SPAS®
JOURNEY TO RELAXATION.™

STEP INTO YOUR FANTASY

PLUG IN

Fantasy Spas are easy to use and can plug in anywhere! No need for additional plumbing or expensive wiring.

Simply fill the hot tub with water from a nearby hose, plug it in to any standard 110v outlet, and you're ready to start hot tubbing!

AFFORDABLE

Our hot tubs are rotationally molded, a manufacturing process which involves less labor and material than is typically required for a traditional, acrylic hot tub.

PORTABLE

Extremely lightweight, our hot tubs are easy to move around the back yard or even across town! Take it home yourself or choose professional delivery!

ENERGY EFFICIENT

There is no need to turn the temperature down when not in use. Fantasy Spas are energy efficient and offer low monthly operating costs. The hot tub's internal thermostat, energy efficient full foam insulation, and locking thermal cover will keep the water hot all the time, so it's always ready whenever you are. Plus it conforms to the strict guidelines set forth by the California Energy Commission.

DURABLE

Fantasy Spas are manufactured using a polyethylene resin, which is then rotationally molded to form a unibody hot tub. This creates an exceptionally durable spa, which will look great for years to come.

ALL MODELS INCLUDE:

Unibody shell and cabinet for enhanced durability

Full foam insulation for maximum energy efficiency

Plug N Play 110v (1kw heater)

Convertible 220v (4kw heater)

New 1.5 BHP pump uses less energy on low speed
